

e-Discovery – TRILANTIC to host data in Germany

Dealing with German privacy rules and regulatory enquiries? Global legal support provider offers clients e-Discovery solutions on the ground.

London – July 1, 2010 – As a further commitment to the company's dedication to offer top end e-Discovery solutions, TRILANTIC has, through a Joint Venture with IKB data, added a fully serviced facility in Germany, Düsseldorf. In this partnership, IKB data's highly secure certified datacenter and leading edge infrastructure is matched with TRILANTIC's cutting edge technology and highly skilled staff, offering clients a combined end to end e-Discovery solution.

TRILANTIC's investment in expanding operations into Germany is the result of growing demand for high-quality electronic discovery services on the ground, driven by increasing regulatory inquiries. As German data privacy rules have tightened, more of TRILANTIC's clients need to have their electronically stored information processed and hosted in Germany prior to sending any data to another jurisdiction.

The initiative for the e-Discovery solution in Germany is lead by Nigel Murray, Chief Executive of TRILANTIC and Jürgen Venhofen, who heads IKB Data.

"We are delighted about our new facilities and look forward to working with IKB data", says Murray, "Our clients, such as international law firms and corporations with either a German office and/or the need for collection and processing of data in Germany are going to immediately benefit from our new location."

"Our clients in Germany require data regulation compliant hosting services, and need the "technical" support to comply with e-Discovery requests, both will be offered by TRILANTIC in Joint Partnership with IKB data", says Venhofen, "we are delighted to make this service available to our clients."

About TRILANTIC

TRILANTIC is a leading European-based legal support services company offering traditional and electronic document management services for all stages of any matter. Services encompass all aspects of electronic discovery and include data collection, electronic document processing, scanning and coding, review, printing, courtroom presentation, online deal and data-room services, and technical support. TRILANTIC specializes in overcoming the challenges of the EU data privacy rules and frequently sends teams to process documents at the client's offices. For more information, visit www.TRILANTIC.co.uk or e-mail TRILANTIC at info@TRILANTIC.co.uk.

About IKB Data

IKB Data is an IT Infrastructure Service Provider offering certified highly secure premium hosting services for data processing and electronic discovery management.
